EDUCATION

Vellore Institute of Technology

B.Tech CSE (Specialization Health Informatics), GPA: 8.54/10

Bhopal, Madhya Pradesh

Oct. 2022 – Present

Delhi Public School Durg

CBSE, X: 90%

Bhilai, Chhattisgarh

Apr. 2017 – Mar. 2018

Delhi Public School Durg

CBSE, XII: 94%

Bhilai, Chhattisgarh

Apr. 2019 – Mar. 2020

PROJECTS

Tourvisto | MongoDB, Express.js, React.js, Node.js

Jan. 2025 – May 2025

- Engineered a full-stack admin dashboard with 10+ interactive components, centralising data management & visualisation.
- Developed 15+ RESTful APIs (Node.js/Express) with MongoDB handling 10K+ records, reducing data lookup time for end-users by 30%.
- Integrated 7 chart types and custom tables to improve data readability for 1000+ concurrent users.
- Applied state management and modular architecture to deliver a responsive, scalable and maintainable app.

Zenote | React, Vite, PWA, Firebase, AES Encryption

Dec. 2024 – Feb 2025

- Designed a privacy-first notes PWA using React, Vite and Firebase, delivering offline-capable note taking and a 100% Lighthouse PWA score.
- Implemented client-side AES encryption for zero-knowledge storage of 5000+ notes, safeguarding user data.
- Architected a modular, responsive UI with custom React hooks for real-time syncing across devices, improving load/render times by 40%.
- Integrated Firebase Authentication and role-based access to manage 1000+ test users securely, ensuring scalability and a smooth user experience.

Nutrigenie | Python, Docker, MongoDB, Streamlit

Jun. 2024 – Sept. 2024

- Built a personalized food recommendation system using Machine Learning (cosine similarity) achieving 89% accuracy in goal-specific meal plans based on users' BMI & BMR.
- Processed 500+ food items with full nutrient profiles, enabling evidence-based recommendations.
- Added recipe generation with nutrient analysis & step-by-step instructions, boosting user engagement by 35%.
- Containerised with Docker & optimised MongoDB queries for < 500 ms recommendation latency, ensuring scalable, real-time results.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++

Web Development: JavaScript, HTML5, CSS (Flexbox, Bootstrap), React, Node.js, Express.js, Angular, Vue.js, Django, Flask, REST APIs

Databases & Data Analysis: MySQL, PostgreSQL, MongoDB, Pandas, NumPy, Tableau, Excel

Machine Learning & AI: TensorFlow, PyTorch, Keras, Scikit-learn, OpenCV

Tools & Platforms: Git, Firebase, Figma, Postman, Linux, Cloud Computing

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

CERTIFICATIONS & ACHIEVEMENTS

Applied Machine Learning in Python – Coursera

Full-Stack Web Development – Udemy

AWS Academy Cloud Foundations & Architecting – AWS Academy

Git Complete – Udemy

Proficiency Award – 7 years (DPS Durg)
