EDUCATION

Vellore Institute Of Technology
B.Tech CSE, GPA: 8.55/10

Bhopal, Madhya Pradesh
Oct. 2022 – Present

Delhi Public School Durg
CBSE, X: 90%

Bhilai, Chhattisgarh
Apr. 2017 – Mar. 2018

Delhi Public School Durg
CBSE, XII: 94%

Bhilai, Chhattisgarh
Apr. 2019 – Mar. 2020

PROJECTS

Tourvisto | MongoDB, Express.js, React.js, Node.js

Jun. 2025 – Aug. 2025

- **Engineered a full-stack admin dashboard** with **10+ interactive components**, centralising **data management** & visualisation.
- **Developed 15+ RESTful APIs** (Node.js/Express) with MongoDB handling **10K+ records**, reducing data **lookup time** for end-users.
- **Integrated 7 chart types** and custom tables to improve data readability for **multiple concurrent users**.
- Applied **state management** and **modular architecture** to deliver a responsive, **scalable** and maintainable app.

CareCrypt | Python(Flask), MySQL, Fernet(AES-128)

May 2025 – Jun. 2025

- **Built** a secure Flask-based web app integrating **Fernet encryption (AES-128 CBC + HMAC)** to protect all prescription records with minimal encryption latency.
- Implemented **secure password storage using PBKDF2/Bcrypt hashing**, strengthening authentication and reducing credential vulnerability by **more than 90%** compared to plaintext.
- Enabled users to **upload & manage multiple prescription images** via file upload or camera capture and stored files in **encrypted form using symmetric encryption (Fernet)**.
- Built an intuitive, **asynchronous UI** prescription lookup and **reducing manual administrative effort**.

Nutrigenie | Python, Docker, MongoDB, Streamlit

Jun. 2024 – Sept. 2024

- **Built a personalized food recommendation system** using **Machine Learning** (cosine similarity) achieving **89% accuracy** in **goal-specific** meal plans based on users' **BMI & BMR**, gender, and activity level..
- **Processed & cleaned** a large-scale recipe **dataset containing 522k+ recipes across 300+ categories** with detailed nutritional attributes using Pandas & NumPy, enabling evidence-based recommendations
- **Built a content-based recommendation feature** using cosine similarity on nutritional vectors to generate top-N (5–10) recipe recommendations.
- **Integrated MongoDB** to manage & retrieve recipe & nutrition data for **dynamic recommendation** generation.

TECHNICAL SKILLS

Programming Languages: Python, Java

Web Development: JavaScript, HTML5, CSS, React, Node.js, Flask, REST APIs

Databases & Data Analysis: MySQL, PostgreSQL, MongoDB, Pandas, NumPy

Machine Learning: Applied ML, TensorFlow, PyTorch, Keras, Scikit-learn

Tools & Platforms: Git, GitHub, Postman, Figma, Linux, VS Code

Core Concepts: Object-Oriented Programming, Computer Networks, Operating Systems, DBMS, Data Structures & Algorithms

COURSES

Applied Machine Learning in Python – Coursera

Full-Stack Web Development – Udemy

AWS Academy Cloud Foundations & Architecting – AWS Academy

Git Complete – Udemy
